DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “to calculate a frequency error produced by said mixer” recited in claim 1 and “to calculate a frequency error produced by said upconverter” in claim 2, wherein the connections between the computer and said mixer and said upconverter must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 1 is objected to because of the following informalities:

Claim 1, line 1: "frequencies" is suggested changing to "frequency".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is in no connection between the composed elements, the down converter, the analog-to-digital converter, the digital receiver, and the digital demodulator to clearly indicate the apparatus for digitally compensating the reception of radio frequency signals to convey the invention.

In claim 2, there is in no connection between the composed elements: the digital modulator, the digital-to-analog converter, and the upconverter to clearly indicate the apparatus for digitally compensating the transmission of radio frequencies to convey the invention.

Allowable Subject Matter

5. Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest, alone or in a combination, among other things, at least an apparatus for digitally compensating the radio frequencies as a whole, the combination of elements and features, which includes a computer receiving the frequency measurement of a first oscillator from a first frequency monitor and the frequency measurement of a second oscillator from a second frequency monitor to calculate the errors of the two oscillators and the frequency error produced by the mixer of the downconverter or by the upconverter and to calculate a numerically controlled oscillator (NCO) setting to the NCO in the modulator or demodulator to get desired frequency.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edith M Chang whose telephone number is 571-272-3041. The examiner can normally be reached on M-F.
